

Bugwood IPM images

Organisation

IPM Images is a joint project of The University of Georgia - Warnell School of Forestry and Natural Resources and College of Agricultural and Environmental Sciences, The Center for Invasive Species and Ecosystem Health, USDA National Institute of Food and Agriculture, Southern Integrated Pest Management Center, Southern Plant Diagnostic Network, and USDA Identification Technology Program.

Summary description of the site

You can select images of various categories of pests found in a wide range of field crops, vegetable, fruit and nut crops, ornamentals and other crops, as well as on the basis of the type of pest category and damage type. You can also search by country or use key word or advanced search. There are over 23,000 images and over 3,800 subjects.
