

Phytosanitary resources

Organisation

International Plant Protection Convention (IPPC)

Summary description of the site

The Phytosanitary Resources page includes over 300 technical resources that are freely available. These include e-learning modules, manuals, training materials, diagnostic protocols, videos, advocacy materials, photographs, a roster of consultants and databases of projects and activities.

The resources fall into two categories - IPPC Technical Resources and Contributed Resources.

- IPPC Technical Resources are developed by the IPPC Secretariat under the direction of its Capacity Development Committee (CDC).
- Contributed Resources can be contributed by anyone, in any language, and are reviewed by the CDC for consistency and relevance to the IPPC.
