Syngenta TankCalc

Organisation

Syngenta

Summary description of the site

The Syngenta TankCalc app is a tool for easy and efficient calculation of filling plans for spraying. It saves time and ensures high accuracy in the tank mixing based on area, tank size, product, dosage and driving speed.
The TankCalc has features like:
• Filling plan with the amount of products, water and number of tanks
• Summary with the total consumption of products and water
• Recommendation for choice of ISO nozzles
• Special features minimize filling- and driving time
